the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.3 billion. This increase is due to the fact that the number of children under 15 years of age has increased in every country in the world, and the increase is particularly large in the developing countries.

The increase in the number of children under 15 years of age has led to a corresponding increase in the number of children who are in need of education. In 1990, there were 1.1 billion children under 15 years of age in the world, and in 2000, there were 1.3 billion children under 15 years of age in the world.

The increase in the number of children in need of education has led to a corresponding increase in the number of children who are out of school. In 1990, there were 1.1 billion children under 15 years of age in the world, and in 2000, there were 1.3 billion children under 15 years of age in the world.

The increase in the number of children out of school has led to a corresponding increase in the number of children who are in need of education. In 1990, there were 1.1 billion children under 15 years of age in the world, and in 2000, there were 1.3 billion children under 15 years of age in the world.
